Change in Investment Pattern:

Investment Pattern -

The Scheme may deviate from the above indicated asset allocation between Equity & Equity related instruments and Debt and money market instruments for a short term period on defensive considerations. However, in case of such deviation, the Scheme shall rebalance the portfolio within 30 calendar days. Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations as per SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 4, 2021, and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation. Further, as per SEBI Master Circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the Scheme within 30 Business Days. In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of the mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the following prescribed restrictions, the reporting and disclosure requirements In case the portfolio of schemes is not rebalanced within the aforementioned mandated plus extended timelines, AMCs shall:

- i. not be permitted to launch any new scheme till the time the portfolio is rebalanced.
- ii. not to levy exit load, if any, on the investors exiting such scheme(s).

Reporting and Disclosure Requirements:

- i. AMCs to report the deviation to Trustees at each stage.
- ii. In case the AUM of deviated portfolio is more than 10% of the AUM of main portfolio of scheme:
 1. AMCs have to immediately disclose the same to the investors through SMS and email / letter including details of portfolio not rebalanced.
 2. AMCs shall also have to immediately communicate to investors through SMS and email / letter when the portfolio is rebalanced.
 3. Subject line of the aforementioned emails / letters should be uniform across industry and clearly indicate "breach of" / "deviation" from mandated asset allocation.

	<p>AMCs shall disclose any deviation from the mandated asset allocation to investors along with periodic portfolio disclosures as specified by SEBI from the date of lapse of mandated plus extended rebalancing timelines.</p> <p>The above mentioned norms shall be applicable to main portfolio only and not to segregated portfolio.</p>
<p>Investment Strategy</p>	<p>The investment objective of the Scheme is to generate long term capital appreciation by investing in equity and equity related instruments across market capitalizations. The scheme selects securities using a rule based active approach based on proprietary protocols. These protocols are derived based on analysis of various market, macroeconomic and fundamental factors described below.</p> <p>Allocation to equity stocks is decided on the basis of market and macroeconomic variables including equity market valuation, interest rates, Gsec yields and money supply.</p> <p>The Scheme will invest predominantly in equity and equity related instruments.</p> <p>Equity stocks are selected and weighted using factor-based rules that aim to achieve a mix of attributes considered supportive of long term performance within risk constraints. A factor can be thought of as any attribute that is important in explaining the risk and / or return of a security. Portfolios can be created on the basis of a single factor or a combination of two or more factors. The latter approach may assist in portfolio diversification and/or as a risk control mechanism.</p> <p>The rule based active investment strategy eliminates all human intervention at the stock selection stage, preventing human bias and ensuring that the portfolio is constructed as intended by the proprietary protocol.</p> <p>While factor definitions and the parameters used to capture them can vary, four factors have been identified by academics and widely adopted by investors over the years as key determinants of a portfolio.</p> <p>Low Volatility : Low-volatility investing identifies stocks that display a lower level of risk than the overall market. Low-volatility equities often lag when the market is rising, but may outperform when the market is falling. Although Low Volatility doesn't generally drive excess returns, it can help smooth out returns.</p> <p>Momentum : Momentum investing presumes that if stocks have performed well in the recent past, they probably will continue outperforming the market for a short period in the future. Investors have a natural desire not to miss out on what they see as a good thing, and our tendency to move as a "herd" fuels the momentum. Momentum may also occur because investors can either overreact or underreact to new information.</p> <p>Quality : Quality focuses on identifying companies that are believed to have a greater ability to deliver sustainable returns to shareholders. These companies are typically characterized by high profitability, low leverage and low earnings volatility. As well, high quality companies are more likely to hold their value in a market downturn,</p>

	<p>meaning they will have less ground to make up when the markets recover. Investors tend to favour stocks that have greater potential short-term upside, often ignoring the risk that these same high-leverage stocks can have greater potential short-term downside as well.</p> <p>Value : Value investing focuses on companies whose stock is selling at a market price below the “intrinsic” value. Since most stock prices eventually return to their long-term average, a tendency known as “mean reversion”, investors who have the patience or time horizon to identify stocks that are trading below their intrinsic value, and then hold on to them until they revert to their fair price, tend to be rewarded.</p> <p>As markets evolve and data availability as well as academic research becomes more sophisticated, the AMC, the understanding and definitions of factors, chooses to opt for more or fewer factors/variables and accordingly add or modify the rules therein.</p> <p>Portfolio Turnover Portfolio turnover is defined as the lower of purchases and sales after reducing all subscriptions and redemptions and derivative transactions there from and calculated as a percentage of the average assets under management of the Scheme during a specified period of time.</p> <p>The AMC’s portfolio management style is conducive to a low portfolio turnover rate. However, the AMC will take advantage of the opportunities that present themselves from time to time because of the inefficiencies in the securities markets. The AMC will endeavour to balance the increased cost on account of higher portfolio turnover with the benefits derived there from.</p> <p>Investment by the AMC in the scheme From time to time and subject to the regulations, the sponsors, the mutual funds and investment Companies managed by them, their affiliates, their associate companies, subsidiaries of the sponsors and the AMC may invest in either directly or indirectly in the Scheme. The funds managed by these affiliates, associates and/ or the AMC may acquire a substantial portion of the Scheme. Accordingly, redemption of units held by such funds, affiliates/associates and sponsors may have an adverse impact on the units of the Scheme because the timing of such redemption may impact the ability of other unit holders to redeem their units.</p> <p>The sponsor or asset management company shall invest not less than one percent of the amount which would be raised in the new fund offer or fifty lakh rupees, whichever is less, and such investment shall not be redeemed unless the scheme is wound up. The Investment shall be made under the growth option of the scheme. For such schemes where growth option is not available the investment shall be made in the Reinvestment of Income Distribution cum capital withdrawal option of the scheme. Further, for such schemes where growth option as well as Reinvestment of Income Distribution cum capital withdrawal option are not available the investment shall be made in the Payout of Income Distribution cum capital withdrawal option of the scheme.</p> <p>The Scheme may invest in other Scheme managed by the AMC or in the Scheme of any other Mutual Funds, provided it is in conformity to the investment objectives of</p>
--	--

	<p>the Scheme and in terms of the prevailing Regulations and guidelines. As per SEBI (MF) Regulations 1996, no investment management fees will be charged for such investments and Procedure followed for Investment decisions.</p> <p>Please refer to Statement of Additional Information available on website www.njmutualfund.com</p>
<p>Risk Profile of the Scheme</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <p>By virtue of requirements under the ELSS, Units issued under NJ ELSS Tax Saver Scheme including the units issued will not be redeemed until the expiry of 3 (three) years from the date of their allotment. The ability of an investor to realise returns on investments in NJ ELSS Tax Saver Scheme Fund is consequently restricted for the first three years.</p> <p>In the event of the death of the unitholder, the nominee or legal heir, as the case may be, shall be able to withdraw the investment only after the completion of one year from the date of allotment of the units to the unitholder or any time thereafter.</p> <p>1. Schemes investing in Equities: Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the scheme to make intended securities purchases, due to settlement problems, could cause the scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the scheme, should there be a subsequent decline in the value of securities held in the scheme portfolio. Also, the value of the scheme investments may be affected by interest rates, currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual securities, a specific sector or all sectors.</p> <p>The scheme may hold such securities for only a very short time, which could tend to increase the costs. The scheme may invest in growth stocks which may be more volatile than the market in general and may react differently to economic, political and market developments and to specific information about the issuer.</p> <p>2. Risks associated with the Scheme's rule based investment strategy: The scheme allocates its assets and selects securities using a rule based active approach based on proprietary protocols. These protocols are derived based on analysis of various market, macroeconomic and fundamental factors described below. Based on the emerging information and analysis, these protocols / rules may change from time to time. There is no guarantee that these rules will generate higher returns compared to the benchmark.</p> <p>3. Risk Associated with Debt and money market instruments:</p> <p>Debt and money market Securities: under this document includes TREPS (or any similar instrument), Repo/Reverse Repo (in Government Securities), Treasury bills, Government securities (Issued by both Central and State governments) and other like</p>

	<p>instruments as specified by the Reserve Bank of India from time to time and approved by SEBI from time to time.</p> <p>Price-Risk or Interest-Rate Risk: Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.</p> <p>Credit Risk: In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in TREPS, Repo/Reverse Repo (in Government Securities), Treasury bills, Government securities (Issued by both Central and State governments) Government securities, there is relatively no credit risk to that extent.</p> <p>Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today's characteristic of the Indian fixed income market.</p> <p>Reinvestment Risk: Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.</p> <p>Pre-payment Risk: Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.</p> <p>Tri Party Repo through CCIL (TREPS): The mutual fund is a member of the securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall". As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the</p>
--	---

event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution For details on risk factors and risk mitigation measures, please refer SID.

to the default fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last recomputation of the Default Fund or specified amount, whichever is lower. Further, it may be noted that CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

4. Risks Associated With Transaction in Units Through Stock Exchange Mechanism:

In respect of transactions in Units of the Scheme through NSE and/or BSE or any other recognized stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Mutual Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognized exchange in this regard. Accordingly, there could be negative impacts to the investors such as delay or failure in allotment / redemption of Units. The Fund and the AMC are not responsible for the negative impacts.

5. Risk associated with Taxation of the Scheme: Equity oriented mutual fund means a fund which has been set up under a scheme of a Mutual Fund specified under clause (23D) of Income Tax Act, 1961 where more than 65% of the investible funds are invested in equity shares of domestic companies. The percentage of equity shareholding of the fund shall be computed with reference to the annual average of the monthly averages of the opening and closing figures. In an event where the percentage of annual average of monthly averages of equity shares of domestic companies falls below 65% of the investible funds, then the scheme may be classified as a Non Equity Oriented Fund and it may have additional tax implication on investors.

6. Risk of Securities Lending: Securities lending is lending of Securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent Securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the Securities borrowed.

There are risks inherent in Securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the

agreement entered into between the lender of the Securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the Securities, inability of the approved intermediary to return the Securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender in respect of the Securities lent. The Fund may not be able to sell such lent Securities and this can lead to temporary illiquidity.

7. Investments by the Scheme in other schemes: The Scheme may invest in other scheme(s) managed by the AMC or in schemes of other mutual funds, provided such investments are in conformity with the investment objectives of the Scheme and in accordance with terms of the prevailing SEBI Regulations. Such investments in other schemes may provide the Scheme access to a specialised investment area or economic sector which can be more effectively accessed by investing in the underlying scheme(s). The Fund Manager will only make such investments if it determines in its discretion that to do so is consistent with the interests of the Unit holders of the Scheme. The Scheme may invest in schemes operated by third parties. Considering third parties are not subject to the oversight or control of the AMC, the Fund Manager may not have the opportunity to verify the compliance of such schemes with the laws and regulations applicable to them.

It is possible that a number of underlying scheme(s) might take substantial positions in the same security at the same time. This inadvertent concentration may interfere with the Scheme's goal of diversification. The AMC would attempt to alleviate any potential inadvertent concentration as part of its regular monitoring and reallocation process. Conversely the AMC may at any given time, hold opposite positions, such positions being taken by different underlying scheme(s). Each such position shall result in transaction fees for the Scheme without necessarily resulting in either a loss or a gain. Moreover, the AMC may proceed to a reallocation of assets between the underlying scheme(s) and liquidate investments made in one or several of them. Further, many of the underlying scheme(s) in which the Scheme may invest could use special investment techniques or concentrate its investments in only one geographic area or asset investment category, which may subject the Scheme's investments to risks different from those posed by investments in equity or fixed income scheme(s) or risks of the market and of rapid changes to the relevant geographic area or investment category.

When the Scheme invests in other schemes, the Unit holders in the Scheme will also incur fees and expenses (such as, but no limited to, management fees, custody fees, registrar fees, audit fees, etc.) at the level of the underlying scheme in accordance with the offering documents of the relevant scheme(s) and the limits prescribed under the SEBI Regulations.

No assurance can be given that the strategies employed by other schemes in the past to achieve attractive returns will continue to be successful or that the return on the Scheme's investments will be similar to that achieved by the Scheme or other schemes in the past.

8. Risk of Changes in Borrowing Rates: The Scheme may borrow funds on a temporary basis within the limits set forth under the SEBI Regulations. The Scheme

may choose to only borrow from the Custodian of the Scheme, and the borrowing rate imposed by the Custodian of the Scheme may change due to market conditions. As a consequence thereof, the borrowing rates imposed by the Custodian may not be the most competitive.

9. Risk Factors relating to Portfolio Rebalancing: In the event that the asset allocation of the Scheme deviates from the ranges as provided in the asset allocation table in this SID, then the Fund Manager will rebalance the portfolio of the Scheme to the position indicated in the asset allocation table within a period of 30 business days from the date of said deviation. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme within the stipulated period of 30 business days then the AMC would notify the Investment Committee of the AMC with appropriate justifications.

10. Risk Factors in case of Corporate Actions: In case the Scheme invests in stocks of companies outside the Index due to corporate actions, then the Fund Manager will rebalance the portfolio of the Scheme to the position indicated in the asset allocation table within a period of 30 days from the date of said deviation. However, if market conditions do not permit exiting the corporate action within this stipulated period of 30 days then the AMC would notify the Board of the Trustee Company and the Investment Committee of the AMC with appropriate justifications.

12. Valuation of the Scheme's Investments: The AMC carries out valuation of investments made by the Scheme. The AMC values Securities and assets in the Scheme according to the valuation policies described in the Statement of Additional Information.

13. Proxy Voting by the AMC: The AMC has adopted policies and procedures designed to prevent conflicts of interest from influencing proxy voting decisions that it makes on behalf of the Scheme, and to help ensure that such decisions are made in accordance with its fiduciary obligations to the Scheme. Notwithstanding proxy voting policies and procedures, proxy voting decisions made by the AMC with respect to Securities held by the Scheme may benefit the interests of AMC other than the Scheme.

14. Risk factors associated with Creation of Segregated Portfolio: In the event of creation of Segregated Portfolio in case of a Credit Event, investors' investments may be subject to following risks:

- Investor holding units of Segregated Portfolio may not be able to liquidate their holding till recovery of money from the issuer.
- Listing of units of Segregated Portfolio on recognised stock exchange does not necessarily guarantee its liquidity. There may not be active trading of units on the exchange. Further trading price of units on the exchange may be significantly lower than the prevailing NAV.
- Security comprising Segregated Portfolio may not realise any value.

15. Other Scheme Specific Risk factors:

	<ul style="list-style-type: none"> ● Investment decisions made by the AMC may not always be profitable, even though it is intended to generate capital appreciation and maximize the returns by passively investing in equity and equity related securities as mentioned in the asset allocation pattern. ● Political Risks: Whereas the Indian market was formerly restrictive, a process of deregulation has been taking place over recent years. This process has involved removal of trade barriers and protectionist measures, which could adversely affect the value of investments. It is possible that the future changes in the Indian political situation, including political, social or economic instability, diplomatic developments and changes in laws and regulations could have an effect on the value of investments. Expropriation, confiscatory taxation or other relevant developments could affect the value of investments. ● Although the objective of the Fund is to generate optimal returns, the objective may or may not be achieved. The investors may note that if the AMC/Investment Manager is not able to make the right decision regarding the timing of increasing exposure in securities other than equities in times of falling equity markets, it may result in negative returns. Given the nature of the scheme, the portfolio turnover ratio may be on the higher side commensurate with the investment decisions and Asset Allocation of the Scheme. At times, such churning of the portfolio may lead to losses due to subsequent negative or unfavorable market movements. ● The tax benefits available under the scheme are as available under the present taxation laws and are available only to certain specified categories of investors and that is subject to fulfillment of the relevant conditions. The information given is included for general purposes only and is based on advice that the AMC has received regarding the law and the practice that is currently in force in India and the investors and the Unitholders should be aware that the relevant fiscal rules and their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor/Unitholder is advised to consult his/her own professional tax advisor.

11. PREVENTION OF MONEY LAUNDERING AND KNOW YOUR CUSTOMER (KYC) According to SEBI Guidelines under 'The Prevention of Money Laundering Act, 2002',

Mutual Funds are required to follow enhanced know your customer (KYC) norms. Further, SEBI has also notified SEBI (KYC Registration Agency) Regulations, 2011 on December 23, 2011 with a view to bring uniformity in KYC requirements for the securities market and to develop a mechanism for centralization of the KYC records. Accordingly the following procedures shall apply:

SEBI has introduced a common KYC Application Form for all the SEBI registered intermediaries viz. Mutual Funds, Portfolio Managers, Depository Participants, Stock Brokers, Venture Capital Funds, Collective Investment Schemes, etc. New Investors are therefore requested to use the common KYC Application Form and carry out the KYC process including IPV with any SEBI registered intermediaries including mutual funds. The KYC Application Forms are also available on our website www.njmutualfund.com

The Fund shall perform the initial KYC of its new investors and may undertake enhanced KYC measures commensurate with the risk profile of its investors in line with the aforementioned circulars/circulars issued by SEBI in this regard from time to time. The Fund shall upload the details of the investors on the system of the KYC Registration Agency ("KRA"). The Registrar & Transfer Agent of the Fund viz. Kfin Technologies Private Limited ("Kfin") may also undertake the KYC of the investors on behalf of the Fund. On receipt of the KYC documents from the Fund, the KRA shall send a letter to the investor within SEBI stipulated timelines, confirming the details thereof.

Once the investor has done KYC with a SEBI registered intermediary, the investor need not undergo the same process again with another intermediary but can submit the letter/acknowledgment issued by the KRA.

It is mandatory for intermediaries including mutual funds to carry out IPV of its new investors. The IPV carried out by any SEBI registered intermediary can be relied upon by the Fund. NJ Asset Management Private Limited and NISM/AMFI certified distributors who are Know Your Distributor (KYD) compliant are authorized to undertake the IPV for mutual fund investors. Further, in case of any applications received directly (i.e. without being routed through the distributors) from the investors, the Fund may rely upon the IPV (on the KYC Application Form) performed by the scheduled commercial banks.

Existing KYC compliant investors of the Fund can continue to invest as per the current practice. However, existing investors are also urged to comply with the new KYC requirements including IPV as mandated by SEBI.

Application Form not accompanied by KYC Application Form or letter/acknowledgment issued by KRA may be rejected by the Fund. The KYC compliance status will be validated with the records of the KRA. AMC reserves the right to call for any additional information from the investors/applicant/reject applications/subsequent application in order to fulfill the requirements of PMLA norms prescribed by SEBI/PMLA Regulation from time to time.
