

AN AMC DRIVEN BY
RULE-BASED INVESTING

FACTSHEET - JANUARY 2024

NJ BALANCED ADVANTAGE FUND

An open-ended dynamic asset allocation fund

Report as on January 31, 2024

Objective:

The investment objective of the scheme is to generate capital appreciation by dynamically allocating its assets between equity and specified debt securities. However, there is no assurance or guarantee that the investment objective of the scheme will be achieved.

Type of the scheme:

An open-ended dynamic asset allocation fund

Entry Load: NA

Exit Load:

- NIL Exit load – for 5% of the units upto completion of 30 days
 - The "First In First Out (FIFO)" logic will be applied while selecting the units for redemption
 - Waiver of Exit load is calculated for each inflow transaction separately on FIFO basis and not on the total units through multiple inflows
 - The load free units from purchases made subsequent to the initial purchase will be available only after redeeming all units from the initial purchase
- All units redeemed /switched-out in excess of the 5% load free units will be subject to the below mentioned exit load.
 - 1.00% - if Units are redeemed/switched-out on or before 30 days from the date of allotment
 - Nil - if redeemed after 30 days from the date of allotment.

Benchmark: NIFTY 50 Hybrid Composite Debt 50:50 Index

NJ ARBITRAGE FUND

An open ended scheme investing in arbitrage opportunities

Report as on January 31, 2024

Objective:

The investment objective of the scheme is to generate capital appreciation and income by predominantly investing in arbitrage opportunities in the cash and derivatives segment of the equity market and by investing the balance in debt and money market instruments. However, there is no assurance or guarantee that the investment objective of the scheme will be achieved.

Type of the scheme:

An open ended scheme investing in arbitrage opportunities

Entry Load: NA**Exit Load:**

- NIL Exit load – for 5% of the units upto completion of 30 days
 - The "First In First Out (FIFO)" logic will be applied while selecting the units for redemption
 - Waiver of Exit load is calculated for each inflow transaction separately on FIFO basis and not on the total units through multiple inflows
 - The load free units from purchases made subsequent to the initial purchase will be available only after redeeming all units from the initial purchase
- All units redeemed /switched-out in excess of the 5% load free units will be subject to the below mentioned exit load.
 - 1.00% - if Units are redeemed/switched-out on or before 30 days from the date of allotment
 - Nil - if redeemed after 30 days from the date of allotment.

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of Respective Scheme.

The returns are calculated by XIRR approach assuming investment of Rs 10000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions.

Data as on 31st January 2024

HOW TO READ A MUTUAL FUND FACTSHEET?

Fund Manager:

An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription:

This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount:

This is the minimum investment amount for an existing investor in a mutual fund scheme

Yield to Maturity:

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP:

Systematic Investment Plan (SIP) works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposits. For instance, an investor may opt for an SIP that invest Rs. 500 every 15th of the month in an equity fund for a period of three years.

NAV:

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark:

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the NIFTY, Sensex, BSE200, BSE500, 10-Year G-Sec.

Entry Load:

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load:

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is Rs. 100 and the exit load is 1%, the redemption price would be Rs. 99 per unit.

Modified Duration:

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation:

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio:

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta Ratio:

Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM:

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings:

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments / securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme:

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile:

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Total Expense Ratio:

The Expenses of a mutual fund include management fees and all the fees associated with the fund's daily operations. Expense Ratio refers to the annual percentage of a fund's assets that is paid out in expenses.

Average Maturity:

The average time of maturity of all the debt securities held in a portfolio. It states the weighted average maturity of the assets in the portfolio.

Portfolio Yield:

The income return on an investment. This refers to the interest or IDCW (previously known as Dividend) received from a security and are usually expressed annually as a percentage based on the investment's cost, its current market value or its face value.

Risk Free Return:

The theoretical rate of return attributed to an investment with zero risk. The risk-free rate represents the interest on an investor's money that he or she would expect from an absolutely risk-free investment over a specified period of time.

Portfolio Turnover Ratio:

This is a measure of the fund's trading activity, which is computed by taking the lesser of purchases or sales (excluding all securities with maturities of less than one year) and dividing by average monthly net assets.

Macaulay duration:

The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

Tracking Error:

The divergence between the price behavior of a position or portfolio and the price behavior of a benchmark.
