V. RISK FACTORS

1. Standard Risk Factors:

a. Standard Risk Factors for investments in Mutual Fund

1. Mutual Funds and securities investments are subject to market risks and there can be no assurance or guarantee that the objectives of the Scheme will be achieved
2. Investment in mutual fund units involves investment risks such as market risk, trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
3. As the price / value / interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down.
4. Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
5. The Sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs. 50,000/- made by it towards setting up the Fund.
6. The AMC will have appropriate controls (including limits) before investing in schemes of mutual funds.

None of the schemes of the Mutual Fund are a guaranteed or assured return scheme.

b. Risk factors of not maintaining average AUM of Rs. 20 crore on half yearly rolling basis (Applicable to Open Ended Debt Scheme):

The Open ended debt scheme shall maintain an average AUM of Rs. 20 crore on half yearly rolling basis. In case, the average AUM falls below Rs. 20 crore, the AMC shall scale up the AUM of such Scheme within a period of six months so as to maintain the average AUM of Rs. 20 crore on half yearly rolling basis, failing which the Scheme shall be wound up in accordance with the provisions of Regulation 39 (2) (c) of SEBI (Mutual Funds) Regulations, 1996 as amended from time to time.

c. Risks Associated with different derivative strategies:

i. Risks Associated with Trading in Derivatives:

Derivatives require the maintenance of adequate controls to monitor the transactions and the embedded market risks that a derivative adds to the portfolio. Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives.

Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme. Other risks in using derivatives include but are not limited to:

Counterparty Risk: This occurs when a counterparty fails to abide by its contractual obligations and therefore, the Schemes are compelled to negotiate with another counter party, at the then prevailing (possibly unfavourable) market price. For exchange traded derivatives, the risk is mitigated as the exchange provides the guaranteed settlement but one takes the performance risk on the exchange.

Market Liquidity: This is the risk that the derivatives cannot be transacted at prices that reflect the underlying assets, rates and indices.

Model Risk: This is the risk of mis-pricing or improper valuation of derivatives.

Basis Risk: This arises when the instrument used as a hedge does not match the movement in the instrument/ underlying asset being hedged.

The risks may be inter-related also; for e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the investment manager to identify such opportunities. Identification and execution of the strategies to be pursued by the investment manager involve uncertainty and decision of the investment manager may not always be profitable. No assurance can be given that the investment manager will be able to identify or execute such strategies.

Derivative trades involve execution risks, whereby the rates seen on the screen may not be the rate at which ultimate execution takes place. The option buyer's risk is limited to the premium paid. Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks. Risk of loss in trading in futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and potential high volatility of the futures markets. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

ii. Risk associated with investing in Derivatives:

As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives since derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

The Scheme may invest in derivatives for the purpose of hedging, portfolio balancing and other purposes as may be permitted under the Regulations. Derivatives will be used in the form of Index Options, Index Futures, Stock Options and Stock Futures and other instruments as may be permitted by SEBI. All derivatives trade will be done only on the exchange with guaranteed settlement. Fund managers will endeavor to use derivatives which are relatively liquid and traded frequently on the exchanges. Exposure with respect to derivatives shall be in line with regulatory limits and the limits specified in the SID. No OTC contracts will be entered into.

d. Other risk factors:

Scheme Specific Risk Factors

i. Schemes investing in Equities:

Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the scheme to make intended securities purchases, due to settlement problems, could cause the scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the scheme, should there be a subsequent decline in the value of securities held in the scheme portfolio. Also, the value of the scheme investments may be affected by interest rates, currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual securities, a specific sector or all sectors.

The scheme may hold such securities for only a very short time, which could tend to increase the costs. The scheme may invest in growth stocks which may be more volatile than the market in general and may react differently to economic, political and market developments and to specific information about the issuer.

ii. Risks associated with the Scheme's rule based investment strategy:

The scheme allocates its assets and selects securities using a rule based active approach based on proprietary protocols. These protocols are derived based on analysis of various market, macroeconomic and fundamental factors described below. Based on the emerging information and analysis, these protocols / rules may change from time to time. There is no guarantee that these rules will generate higher returns compared to the benchmark.

iii. Risk Associated with Specified Debt Securities:

Specified Debt Securities under this document includes TREPS (or any similar instrument), Repo/Reverse Repo (in Government Securities), Treasury bills, Government securities (Issued by both Central and State governments) and other like instruments as specified by the Reserve Bank of India from time to time and approved by SEBI from time to time.

Price-Risk or Interest-Rate Risk: Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.

Credit Risk: In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in TREPS, Repo/Reverse Repo (in Government Securities), Treasury bills, Government securities (Issued by both Central and State governments) Government securities, there is relatively no credit risk to that extent.

Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today's characteristic of the Indian fixed income market.

Reinvestment Risk: Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

Pre-payment Risk: Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.

Tri Party Repo through CCIL (TREPS): The mutual fund is a member of the securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall". As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution to the default fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last recomputation of the Default Fund or specified amount, whichever is lower. Further, it may be noted that CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

iii. Risks Associated With Transaction in Units Through Stock Exchange Mechanism:

In respect of transactions in Units of the Scheme through NSE and/or BSE or any other recognized stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Mutual Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognized exchange in this regard. Accordingly, there could be negative impacts to the investors such as delay or failure in allotment / redemption of Units. The Fund and the AMC are not responsible for the negative impacts.

iv. Risk associated with Taxation of the Scheme:

Equity oriented mutual fund means a fund which has been set up under a scheme of a Mutual Fund specified under clause (23D) of Income Tax Act, 1961 where more than 65% of the investible funds are invested in equity shares of domestic companies. The percentage of equity shareholding of the fund shall be computed with reference to the annual average of the monthly averages of the opening and closing figures. In an event where the percentage of annual average of monthly averages of equity shares of domestic companies falls below 65% of the investible funds, then the scheme may be classified as a Non Equity Oriented Fund and it may have additional tax implication on investors.

v. Risk of Securities Lending:

Securities lending is lending of Securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent Securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the Securities borrowed.

There are risks inherent in Securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of the Securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the Securities, inability of the approved intermediary to return the Securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender in respect of the Securities lent. The Fund may not be able to sell such lent Securities and this can lead to temporary illiquidity.

vi. Risk of Changes in Borrowing Rates:

The Scheme may borrow funds on a temporary basis within the limits set forth under the SEBI Regulations. The Scheme may choose to only borrow from the Custodian of the Scheme, and the borrowing rate imposed by the Custodian of the Scheme may change due to market conditions. As a consequence thereof, the borrowing rates imposed by the Custodian may not be the most competitive.

vii. Risk Factors relating to Portfolio Rebalancing:

In the event that the asset allocation of the Scheme deviates from the ranges as provided in the asset allocation table in this SID, then the Fund Manager will rebalance the portfolio of the Scheme to the position indicated in the asset allocation table within a period of 30 business days from the date of said deviation. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme within the stipulated period of 30 business days then the AMC would notify the Investment Committee of the AMC with appropriate justifications.

viii. Risk Factors in case of Corporate Actions:

In case the Scheme invests in stocks of companies outside the Index due to corporate actions, then the Fund Manager will rebalance the portfolio of the Scheme to the position indicated in the asset allocation table within a period of 30 days from the date of said deviation. However, if market conditions do not permit exiting the corporate action within this stipulated period of 30 days then the AMC would notify the Board of the Trustee Company and the Investment Committee of the AMC with appropriate justifications.

ix. Risk factors associated with Creation of Segregated Portfolio:

In the event of creation of Segregated Portfolio in case of a Credit Event, investors' investments may be subject to following risks:

- Investor holding units of Segregated Portfolio may not be able to liquidate their holding till recovery of money from the issuer.
- Listing of units of Segregated Portfolio on recognised stock exchange does not necessarily guarantee its liquidity. There may not be active trading of units on the exchange. Further trading price of units on the exchange may be significantly lower than the prevailing NAV.

Security comprising Segregated Portfolio may not realise any value.

x. Risks associated with investment in schemes of mutual fund:

The AMC will have appropriate controls (including limits) before investing in schemes of mutual funds.

xi. Risk Associated with Equity and equity related instruments:

Concentration Risk: Concentration risk represents the probability of loss arising from heavily lopsided exposure to a particular group of sectors or securities. The Scheme will try and mitigate this risk by investing in a large number of companies so as to maintain optimum diversification and keep stock-specific concentration risk relatively low.

Market Risk: The scheme is vulnerable to movements in the prices of securities invested by the scheme, which could have a material bearing on the overall returns from the scheme. Market risk is a risk which is inherent to an equity scheme. The Schemes may use derivatives to limit this risk.

Liquidity risk: The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests. As such the liquidity of stocks that the fund invests into could be relatively low. The fund will try to maintain a proper asset-liability match to ensure redemption / Maturity payments are made on time and not affected by illiquidity of the underlying stocks.

Rule based investment: The investment in the equity stocks will be selected and weighted using factor-based investment techniques that aim to achieve a mix of attributes considered supportive of long term performance and investments shall be made on the basis of pre-defined rules. To maintain the relevance of these rules in changing market conditions, the AMC may review and update the rule from time to time.

xii. Risk associated with Specified Debt Securities:

Liquidity risks: The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.

Interest Rate Risk: Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk.

Volatility risks: There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification.

Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Schemes are reinvested. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed. Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.

xiii. Risk Associated with the Arbitrage Strategy:

The Scheme proposes to invest in equity and equity related instruments by identifying and exploiting price discrepancies in cash and derivative segments of the market. These investments by nature are volatile as the prices of the underlying securities are affected by various factors such as liquidity, time to settlement date, news flow, spreads between cash and derivatives market at different points of time, trading volumes, etc.

- There is no guarantee that the Fund Manager will be able to spot investment opportunities or correctly exploit price discrepancies in the different segments of the market.
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices
- The Scheme is also expected to have a high portfolio churn, especially in a volatile market. There is an execution risk while implementing arbitrage strategies across various segments of the market, which may result in missed investment opportunities, or may also result in losses/high transaction costs.
- In case of a large outflow from the Scheme, the Scheme may need to reverse the spot-futures transaction before the settlement of the futures trade. While reversing the spot-futures transaction on the Futures and Options settlement day on the exchange, there could be a risk of volume-weighted-average-price of the market being different from the price at which the actual reversal is processed resulting in basis risk.
- While future market are typically more liquid than underlying cash market, there can be no assurance that ready liquidity would exists at all point in time for the scheme to purchase and close out a specific futures contract
- In case of arbitrage, if futures are allowed to expire with corresponding buy/sell in cash market, there is a risk that price at which futures expires, may/may not match with the actual cost at which it is bought/sold in the cash market in last half an hour of the expiry day (Weighted average price for buy or sell).

xiii. Investments by the Scheme in other schemes:

The Scheme may invest in other scheme(s) managed by the AMC or in schemes of other mutual funds, provided such investments are in conformity with the investment objectives of the Scheme and in accordance with terms of the prevailing SEBI Regulations.

Such investments in other schemes may provide the Scheme access to a specialised investment area or economic sector which can be more effectively accessed by investing in the underlying scheme(s). The Fund Manager will only make such investments if it determines in its discretion that to do so is consistent with the interests of the Unit holders of the Scheme. The Scheme may invest in schemes operated by third parties. Considering third parties are not subject to the oversight or control of the AMC, the Fund Manager may not have the opportunity to verify the compliance of such schemes with the laws and regulations applicable to them.

It is possible that a number of underlying scheme(s) might take substantial positions in the same security at the same time. This inadvertent concentration may interfere with the Scheme's goal of diversification. The AMC would attempt to alleviate any potential inadvertent concentration as part of its regular monitoring and reallocation process. Conversely the AMC may at any given time, hold opposite positions, such positions being taken by different underlying scheme(s). Each such position shall result in transaction fees for the Scheme without necessarily resulting in either a loss or a gain. Moreover, the AMC may proceed to a reallocation of assets between the underlying scheme(s) and liquidate investments made in one or several of them. Further, many of the underlying scheme(s) in which the Scheme may invest could use special investment techniques or concentrate its investments in only one geographic area or asset investment category, which may subject the Scheme's investments to risks different from those posed by investments in equity or fixed income scheme(s) or risks of the market and of rapid changes to the relevant geographic area or investment category.

When the Scheme invests in other schemes, the Unit holders in the Scheme will also incur fees and expenses (such as, but not limited to, management fees, custody fees, registrar fees, audit fees, etc.) at the level of the underlying scheme in accordance with the offering documents of the relevant scheme(s) and the limits prescribed under the SEBI Regulations.

No assurance can be given that the strategies employed by other schemes in the past to achieve attractive returns will continue to be successful or that the return on the Scheme's investments will be similar to that achieved by the Scheme or other schemes in the past.

xiv. Risks associated with Securities Lending & Borrowing and Short Selling:

At present, there is no significant activity in the Securities Borrowing and Lending market. However, we understand the risks associated with the securities lending business and the AMC will have appropriate controls (including limits) before initiating any such transactions.

xv. Other Scheme Specific Risk factors:

- Investment decisions made by the AMC may not always be profitable, even though it is intended to generate capital appreciation and maximize the returns by passively investing in equity and equity related securities as mentioned in the asset allocation pattern.
- Political Risks: Whereas the Indian market was formerly restrictive, a process of deregulation has been taking place over recent years. This process has involved removal of trade barriers and protectionist measures, which could adversely affect the value of investments. It is possible that the future changes in the Indian political situation, including political, social or economic instability, diplomatic developments and changes in laws and regulations could have an effect on the value of investments. Expropriation, confiscatory taxation or other relevant developments could affect the value of investments.

- Although the objective of the Fund is to generate optimal returns, the objective may or may not be achieved. The investors may note that if the AMC/Investment Manager is not able to make the right decision regarding the timing of increasing exposure in securities other than equities in times of falling equity markets, it may result in negative returns. Given the nature of the scheme, the portfolio turnover ratio may be on the higher side commensurate with the investment decisions and Asset Allocation of the Scheme. At times, such churning of the portfolio may lead to losses due to subsequent negative or unfavorable market movements.
- The tax benefits available under the scheme are as available under the present taxation laws and are available only to certain specified categories of investors and that is subject to fulfillment of the relevant conditions. The information given is included for general purposes only and is based on advice that the AMC has received regarding the law and the practice that is currently in force in India and the investors and the Unitholders should be aware that the relevant fiscal rules and their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor/Unitholder is advised to consult his/her own professional tax advisor.

2. SPECIAL CONSIDERATIONS

1. Prospective investors should study this Statement of Additional Information carefully in its entirety and should not construe the contents thereof as advice relating to legal, taxation, financial, investment or any other matters and are advised to consult their legal, tax, financial and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, before making a decision to invest/redeem/hold Units.

2. The Scheme related documents i.e. SID/ KIM/ SAI or the units of the Fund are not registered in any jurisdiction including the United States of America nor in any provincial/ territorial jurisdiction in Canada. The distribution of the Scheme related document in certain jurisdictions may be restricted or subject to registration requirements and, accordingly, persons who come into possession of the Scheme related documents are required to inform themselves about, and to observe any such restrictions. No persons receiving a copy of this Scheme related documents or any accompanying application form in such jurisdiction may treat these Scheme related documents or such application form as constituting an invitation to them to subscribe for units, nor should they in any event use any such application form, unless in the relevant jurisdiction such an invitation could lawfully be made to them and such application form could lawfully be used without compliance with any registration or other legal requirements. Accordingly, the Scheme related documents do not constitute an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make such offer or solicitation as per applicable law.

3. The AMC, Trustee or the Mutual Fund have not authorized any person to issue any advertisement or to give any information or to make any representations, either oral or written, other than that contained in this Statement of Additional Information or the Scheme Information Document as is provided by the AMC in connection with this offering. Prospective investors are advised not to rely upon any information or representation not incorporated in the Scheme Information Document or Statement of Additional Information or as provided by the AMC as having been authorized by the Mutual Fund, the AMC or the Trustee.

4. The Open ended equity scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. The two conditions mentioned above shall also be complied within each calendar quarter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period.

5. Redemption due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any such tax consequences that may arise due to such Redemptions.

6. The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any of the tax consequences that may arise, in the event that the Scheme is wound up for the reasons and in the manner provided in this 'Statement of Additional Information'.

7. The tax benefits described in this Statement of Additional Information and Scheme Information Document are as available under the present taxation laws and are available subject to relevant conditions. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India as on the date of this Statement of Additional Information and the Unit holders should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Unit holder is advised to consult his / her own professional tax advisor.

8. The Mutual Fund may disclose details of the investor's account and transactions there under to those intermediaries whose stamp appears on the application form or who have been designated as such by the investor. In addition, the Mutual Fund may disclose such details to the bankers, as may be necessary for the purpose of effecting payments to the investor. The Fund may also disclose such details to regulatory and statutory authorities/bodies as may be required or deemed necessary.

9. In case the AMC or its Sponsor or its Shareholders or their /associates or group companies make substantial investment, either directly or indirectly in the Scheme, Redemption of units by these entities may have an adverse impact on the performance of the Scheme. This may also affect the ability of the other unit holders to redeem their units.

10. As the liquidity of the Scheme's investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Fund for Redemption of Units may be significant in the event of an inordinately large number of Redemption requests or of a restructuring of the Scheme's portfolio. In view of this, the Trustee has the right, in its sole discretion, to limit Redemptions under certain circumstances - please refer to the paragraph "Suspension/Restriction on Redemption of Units of the Scheme" in respective Scheme Information Documents of the schemes of the Mutual Fund.

11. - k) In case of fund of fund schemes, if the underlying scheme suspends sale (including switch-in) of units.
- l) If so directed by SEBI.

Additionally the AMC reserves the right in its sole discretion to withdraw the facility of Sale (including switch-in) of Units into and out of the Scheme(s) (including any one Plan / Option Of the Scheme), temporarily or indefinitely, if AMC views that changing the size of the corpus may prove detrimental to the existing Unit holders of the Scheme(s).

The Fund at its sole discretion reserves the right to restrict Redemption (including switch-out) of the Units (including Plan / Option) of the Scheme(s) of the Fund upon occurrence of the below mentioned events for a period not exceeding ten (10) working days in any ninety (90) days period subject to approval of the Board of Directors of the AMC and the Trustee Company .

Further, no restriction shall be applicable to the Redemption / switch-out request upto Rs. 2,00,000/- (Rupees Two Lakhs). It is further clarified that, in case of redemption request beyond Rs. 2,00,000/- (Rupees Two Lakhs), no restriction shall be applicable on first Rs. 2,00,000/- (Rupees Two Lakhs).

The Trustee / AMC reserves the right to restrict Redemption or suspend Redemption of the Units in the Scheme(s) of the Fund on account of circumstances leading to a systemic crisis or event(s) that severely constrict market liquidity or the efficient functioning of the markets. A list of such circumstances under which the restriction on Redemption or suspension of Redemption of the Units in the Scheme(s) of the Fund may be imposed are as follows:

It is clarified that since the occurrence of the abovementioned eventualities have the ability to impact the overall market and liquidity situation, the same may result in exceptionally large number of Redemption requests being made and in such a situation the indicative timelines mentioned by the Fund in the scheme offering documents, for processing of requests for Redemption may not be applicable.

4. ASBA disclosures

49. Additional mode of payment through Applications Supported by Blocked Amount (ASBA) facility:

Pursuant to SEBI Master Circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023 read with SEBI Circular SEBI/IMD/CIR No 18 /198647 /2010 dated March 15, 2010 read with SEBI circular no. Hence, all the NFOs to be launched by the Mutual Fund shall have ASBA facility, which will co-exist with the existing mode of subscription.

ASBA is an application containing an authorization given by the Investor to block the application money in his Self Certified Syndicate Bank (SCSB) towards the subscription of Units offered during the NFO of the Scheme of NJ Mutual Fund.

Thus, for an investor who applies through ASBA facility, the application money towards the subscription of Units shall be debited from his/her specified bank account only if his/her application is selected for allotment of Units.

A. Benefits of Applying through ASBA facility:

- (a) Writing cheques and demand drafts is not required, as investor needs to submit ASBA application form accompanying an authorization to block the account to the extent of application money towards subscription of Units to a SCSB. The balance money, if any, in the account can be used for other purposes by the investors.
- (b) Release/Unblocking of blocked funds after allotment is done instantaneously.
- (c) Unlike other modes of payment, ASBA facility prevents the loss of interest income on the application money towards subscription of Units as it remains in the bank account of the investor till the allotment is made.
- (d) Refunds of money to the investors do not arise as the application money towards subscription of Units gets blocked only on the allotment of Units.
- (e) The investor deals with the known intermediary i.e. his/her own bank.
- (f) The application form is simpler as the application form for ASBA will be different from the NFO application form.

B. ASBA Procedure

- (a) An investor intending to subscribe to the Units of the NFO through ASBA, shall submit a duly completed ASBA Application Form to a Self Certified Syndicate Bank (SCSB), with whom his/her bank account is maintained.
- (b) An ASBA investor shall submit a duly filled up ASBA Application form, physically or electronically to the SCSB with whom the investors holds the bank account which is to be blocked.
 - i. In case of ASBA application in physical mode, the investor shall submit the ASBA Application Form at the bank branch of SCSB specifying the Bank account number, which is designated for the purpose and the investor must be holding a bank account with such SCSB.
 - ii. In case of ASBA application in electronic form, the investor shall submit the ASBA Application form either through the internet banking facility available with the SCSB, or such other electronically enabled mechanism for subscribing to units of Mutual Fund schemes authorizing to block the subscription money in a bank account.
- (c) An acknowledgement will be given by the SCSB in the form of the counterfoil or specifying the application number for reference. Such acknowledgement does not guarantee, in any manner that the investors will be allotted the Units applied for. The Application shall be further processed by the Registrar & Transfer agent appointed by the Mutual Fund and units shall be allotted after deducting the blocked amount, only if the application is complete in all respect to the Mutual Fund/ Registrar & Transfer Agent.

Note: If the bank account specified in the ASBA Application Form does not have sufficient credit balance to meet the application money towards the subscription of Units, the Bank shall reject the ASBA Application form.

- (d) On acceptance of Physical or Electronic ASBA, the SCSB shall block funds available in the bank account specified to the extent of the application money specified in the ASBA Application Form.

- (e) ASBA application form will not be accepted by any of the offices of NJ Mutual Fund or its Registrar & Transfer Agent, i.e. KFin Technologies Limited (“KFin”).
- (f) The application money towards the Subscription of Units shall be blocked in the account until

 - ii. in case the application is rejected.
- (h) During processing of the ASBA Application Forms by RTA, if the application is found to be incomplete or incorrect, the SCSB will be informed on the same who will then unblock the investor account with appropriate remarks in the investor account.
- (i) The list of SCSBs and their DBs where ASBA application form can be submitted is available on the websites of BSE (www.bseindia.com), NSE (www.nseindia.com) and SEBI (www.sebi.gov.in) and shall also be given in the ASBA application form.

Note: No request for withdrawal of ASBA application form will be allowed after the closure of the New Fund Offer Period.

The AMC’s portfolio management style is conducive to a low portfolio turnover rate. D. Information pertaining to Investments by the Schemes

1. Derivative strategies:

If and where Derivative strategies are used under the scheme the Fund Manager will employ a combination of the following strategies:

A. Index Arbitrage:

As the Nifty 50 Index derives its value from fifty underlying stocks, the underlying stocks can be used to create a synthetic index matching the Nifty Index levels. Also, theoretically, the fair value of a stock/ index futures is equal to the spot price plus the cost of carry i.e. the interest rate prevailing for an equivalent credit risk, in this case is the Clearing Corporation of the NSE.

Theoretically, therefore, the pricing of Nifty Index futures should be equal to the pricing of the synthetic index created by futures on the underlying stocks. However, due to market imperfections, the index futures may not exactly correspond to the synthetic index futures.

The Nifty Index futures normally trades at a discount to the synthetic Index due to large volumes of stock hedging being done using the Nifty Index futures giving rise to arbitrage opportunities.

The fund manager shall aim to capture such arbitrage opportunities by taking long positions in the Nifty Index futures and short positions in the synthetic index. The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of-capital.

Objective of the Strategy

The objective of the strategy is to lock-in the arbitrage gains.

Risks Associated with this Strategy

- Lack of opportunity available in the market
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices:
- Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place.

B. Cash Futures Arbitrage: (Only one way as funds are not allowed to short in the cash market).

The scheme would look for market opportunities between the spot and the futures market.

The cash futures arbitrage strategy can be employed when the price of the futures exceeds the price of the underlying stock.

The Scheme will first buy the stocks in the cash market and then sell in the futures market to lock the spread known as arbitrage return.

Buying the stock in the cash market and selling the futures results into a hedge where the Plans have locked in a spread and is not affected by the price movement of the cash market and futures market. The arbitrage position can be continued till expiry of the future contracts.

The future contracts are settled based on the last half an hour's weighted average trade of the cash market. Thus there is a convergence between the cash market and the futures market on expiry. This convergence helps the Plans under the Scheme to generate the arbitrage return locked in earlier. However, the position could even be closed earlier in case the price differential is realized before expiry or better opportunities are available in other stocks. The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of-capital.

Objective of the Strategy

The objective of the strategy is to lock-in the arbitrage gains.

Risk Associated with this Strategy

- Lack of opportunity available in the market.
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place

C. Hedging and alpha strategy:

The fund will use exchange-traded derivatives to hedge the equity portfolio. The hedging could be either partial or complete depending upon the fund managers' perception of the markets. The fund manager shall either use index futures and options or stock futures and options to hedge the stocks in the portfolio. The fund will seek to generate alpha by superior stock selection and removing market risks by selling appropriate index. For example,

3. Provisions on creation of Segregated portfolio/ Side pocketing

SEBI vide Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023 stipulates creation of a segregated portfolio of debt and money market instruments by mutual funds schemes in order to ensure fair treatment to all investors in case of a credit event and to deal with liquidity risk.

- The term 'segregated portfolio' shall mean a portfolio, comprising of debt or money market instruments affected by a credit event, that has been segregated in a mutual fund scheme.
- The term 'main portfolio' shall mean the scheme portfolio excluding the segregated portfolio.
- The term 'total portfolio' shall mean the scheme portfolio including the securities affected by the credit event.

'NJAMPL' may create segregated portfolio in the a mutual fund scheme subject to the following:

1. Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:

- a. Downgrade of a debt or money market instrument to 'below investment grade', or
- b. Subsequent downgrades of the said instruments from 'below investment grade', or
- c. Similar such downgrades of a loan rating.

In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events and implemented at the ISIN level.

2. Segregated portfolio of such unrated debt or money market instruments may be created only in case of actual default of either the interest or principal amount. For the purpose of creating the segregated portfolio 'actual default' by the issuer of such instruments shall be considered.

NJAMPL shall inform AMFI immediately about the actual default by the issuer. Upon being informed about the default, AMFI shall immediately inform the same to all AMCs. Pursuant to dissemination of information by AMFI about actual default by the issuer, AMCs may segregate the portfolio of debt or money market instruments.

Process for creation of a segregated portfolio.

1. 'NJAMPL' shall decide on creation of a segregated portfolio on the day of 'credit event' or 'actual default (for unrated debt and money market instrument as well as debt instruments such as Additional Tier I bonds and Additional Tier II bonds issued under Basel III framework having special features)'. Once 'NJAMPL' decides to segregate portfolio, it shall:

NJ Mutual Fund should also disclose that the segregation shall be subject to NJTPL approval. Additionally, the said press release shall be prominently disclosed on the website of the NJAMPL.
 - c. Further the Board of Directors of 'NJAMPL' shall ensure that till the time the approval of the Board of Directors of 'NJTPL' is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.
2. Once the Board of Directors of NJTPL approves the said proposal, NJAMPL shall ensure that:-
 - a. Segregated portfolios shall be effective from the day of credit event.
 - b. NJAMPL shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.
 - c. An e-mail or SMS should be sent to all unit holders of the concerned scheme.
 - d. The NAV of both segregated and main portfolios shall be disclosed from the day of the 'credit event' or 'actual default'.
 - e. All existing investors in the scheme as on the day of the 'credit event' or 'actual default' as the case may be, shall be allotted an equal number of units in the segregated portfolio as held in the main portfolio.
 - f. No redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolios, NJAMPL shall enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests.
3. In case the Board of Directors of NJTPL do not approve the proposal to segregate portfolios, NJAMPL shall issue a press release immediately informing investors of the same.

Valuation and processing of subscriptions and redemptions.

Notwithstanding the decision to segregate the debt and money market instrument, the valuation should take into account the credit event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder.

2. All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the existing circular on applicability of NAV as under:

- i. On receipt of the approval of the Board of Directors of 'NJTPL' to create a segregated portfolio -
- Investors redeeming their units will get redemption proceeds based on the NAV of the main portfolio and will continue to hold the units of the segregated portfolio.
 - Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.
- ii. In case the Board of Directors of NJTPL do not approve the proposal of the segregated portfolio, subscription and redemption applications will be processed based on the NAV of the total portfolio.

Disclosure Requirements

In order to enable the existing as well as the prospective investors to take informed decision, the following shall be adhered to:

- A. A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.

- 'NJAMPL' shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in the segregated portfolio.
- The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on a daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.
- The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the 'NJAMPL'.
- The costs related to a segregated portfolio shall in no case be charged to the main portfolio.

In order to ensure timely recovery of investments of the segregated portfolio, the Board of Directors of 'NJTPL' shall ensure that:

- i. 'NJAMPL' puts in sincere efforts to recover the investments of the segregated portfolio.
- ii. Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
- iii. An Action Taken Report (ATR) on the efforts made by the NJAMPL to recover the investments of the segregated portfolio is placed in every meeting of the Board of Directors of 'NJTPL' till the investments are fully recovered/ written-off.
- iv. The Board of Directors of 'NJTPL' shall monitor the compliance of the circulars issued from time to time and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, the Board of Directors of 'NJTPL' shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the NJAMPL, including claw back of such amount to the segregated portfolio of the scheme.

Further NJAMPL should ensure that the existence of the provisions for segregated portfolios should not undertake undue credit risk in the scheme portfolio.

Illustration of Segregated Portfolio :

An illustration in tabular form explains how a security affected by a credit event will be segregated and its impact on investors. Whether the distressed security is held in the original portfolio or the segregated portfolio, the value of the investors' holdings will remain the same on the date of the credit event. Over time, the NAVs of the portfolios are subject to change.

Key Assumptions: We have assumed a scheme holds 4 securities (A1, A2, A3 & A4) in its portfolio. It has two investors with 5,000 units. (Investor 1 - 3,000 units, Investor 2 - 2,000 units). Total Portfolio Value of Rs. 40 Lakhs (Each security invested is valued at Rs. 10 Lakh).

Current NAV: $40,00,000/5,000 = \text{Rs. } 800$ per unit.

Suppose Security A4 is downgraded to below investment grade and consequently the value of the security falls from Rs. 10,00,000 to Rs. 2,00,000 and the AMC decides to segregate the portfolio.

Investors will be allotted the same number of units in the segregated portfolio as they hold in the main portfolio. So, Investor 1 will get 3,000 Units and Investor 2 will get 2,000 units in the segregated portfolio. With segregation, the portfolio value is Rs. 32,00,000 (Now A1, A2 & A3 Securities worth Rs. 30 Lakh and Security A4, which has fallen from Rs. 10,00,000 to Rs. 2,00,000).

Particulars	Main Portfolio (Security A1, A2 & A3)	Segregated Portfolio (Security A4)
Net Assets	Rs. 30,00,000	Rs. 2,00,000
No of Units	5,000	5,000

NAV Per unit	Rs. 30,00,000 / 5000= Rs. 600	Rs. 2,00,000 / 5000= Rs. 40
--------------	-------------------------------	-----------------------------

With Respect to Investors:

Particulars	Investor 1	Investor 2
Units held in the main Portfolio	3,000	2,000
NAV of the main Portfolio	Rs. 600	Rs. 600
Value of Holding in main Portfolio (X) in Rs.	3,000 * Rs. 600 = Rs. 18,00,000	2,000* Rs.600= Rs.12,00,000
Units held in Segregated Portfolio	3,000	2,000
NAV of Segregated Portfolio	Rs. 40	Rs. 40
Value of Holding in Segregated Portfolio (Y) in Rs.	3,000 * Rs. 40 = Rs. 1,20,000	2,000 * Rs. 40 = Rs. 80,000
Total Value of Holding (X) + (Y) in Rs.	Rs. 18,00,000 + Rs. 1,20,000 = Rs. 19,20,000	Rs. 12,00,000+ Rs. 80,000 = Rs. 12,80,000

In case the portfolio is not segregated, the Total Portfolio after marking down the value of security A4 would be:
Net Assets of the Portfolio Rs. 32,00,000

No. of Units 5,000

NAV per unit = Rs. 32,00,000 / 5,000 = Rs. 640

Particulars	Investor 1	Investor 2
Units held in the Original Portfolio (No. of units)	3,000	2,000
NAV of the Main Portfolio	Rs. 640	Rs. 640
Value of Holding in Main Portfolio (X) in Rs.	3,000 * Rs. 640 = Rs. 19,20,000	2,000*640= Rs.12,80,000

Investors may note the essential difference between a segregated portfolio and non-segregated portfolio as follows:

- Where the portfolio is not segregated, the transactions will continue to be processed at NAV based prices. There will be no change in the number of units remaining outstanding
- Where the portfolio is segregated, equal number of units are created and allotted to reflect the holding for the portion of portfolio that is segregated
- Once the portfolio is segregated, the transactions will be processed at NAV based prices of main portfolio
- Since the portfolio is segregated for distressed security, the additional units that are allotted cannot be redeemed. The units will be listed on the recognised stock exchange to facilitate exit to unit holders
- Upon realisation of proceeds under the distressed security either in part or full, the proceeds will be paid accordingly.

The AMC / Mutual Fund shall adhere to such other requirements as may be prescribed by SEBI / AMFI in this regard.

4. Short selling/ stock lending

Subject to the SEBI (MF) Regulations 1996 as applicable from time to time, the Mutual Fund may engage in Stock Lending. Stock Lending means the lending of stock to another person or entity for a fixed period of time, at a negotiated compensation. The securities lent will be returned by the borrower on the expiry of the stipulated period. For details, investors are requested to refer to the Scheme Information Document of the respective schemes.
